Matter of a few degrees... but the impact will be **DISASTROUS**

[CLICK HERE: PAGE 1 AND 2](#)

Ukraine-Russia conflict: Latest developments

1 MOSCOW DEPLOYS 7,000 MORE TROOPS: The tensions over a possible Russian invasion of Ukraine continues to simmer as a senior White House official claimed that Moscow's announcement of a troop withdrawal is "false", and the country has added around 7,000 troops at the Ukrainian border.

Europe's worst security risk since the Cold War.

2 NATO NOT CONVINCED: The United States of America and NATO also said that there was no sign of Russian troops withdrawing. The Russian military buildup at the Ukrainian border is being described as

3 US HOPES INDIA TO STAND BY ITS SIDE IF RUSSIA INVADES UKRAINE: The United States has pinned hope on India that it would stand by its side in case Russia invades Ukraine. "There was a strong consensus in the QUAD meeting that there needs to be a diplomatic – a peaceful resolution to this. One of the core tenants of the QUAD is to reinforce the rules based on international order," US state department spokesperson Ned Price said.

Indian govt establishes control room, helpline desk
The ministry of external affairs (MEA) has established a control room and a 24-hour helpline at the Embassy of India in Ukraine

Time and again, world leaders have stressed the need to limit global warming to 1.5 degrees Celsius

What's the difference between 1.5°C and 2°C of global warming?

WHAT The 2015 Paris Agreement commits countries to limit the global average temperature rise to well below 2°C above pre-industrial levels, and to aim for 1.5°C. Scientists have said crossing the 1.5°C threshold risks unleashing far more severe climate change effects on people, wildlife and ecosystems. Preventing it requires almost halving global CO2 emissions by 2030 from 2010 levels and cutting them to net-zero by 2050 – an ambitious task that scientists, financiers, negotiators and activists are debating how to achieve and pay for.

WHERE ARE WE NOW? Already, the world has heated to around 1.1°C above pre-industrial levels. Each of the last four decades was hotter than any decade since 1850. According to scientists, half a degree means much more extreme weather, and it can be more often, more intense, or extended in duration.

1. HEAT, RAIN, DROUGHT

■ More warming to 1.5°C and beyond will worsen global climate. For example, heat-waves would become both more frequent and more severe. An extreme heat event that occurred once per decade in a climate without human influence, would happen 4.1 times a decade at 1.5°C of warming, and 5.6 times at 2°C, according to the UN climate science panel (IPCC).
■ A warmer atmosphere can also hold more moisture, resulting in more extreme rainfall that raises flood risks. It also increases evaporation, leading to more intense droughts.

2. ICE, SEAS, CORAL REEFS

■ The difference between 1.5°C and 2°C is critical for Earth's oceans and frozen regions. At 1.5°C, there's a good chance that we can prevent most of the Greenland and west Antarctic ice sheet from collapsing. That would help limit sea level rise to a few feet by the end of the century – still a big change that would erode coastlines and inundate some small island states and coastal cities.
■ But below 2°C and the ice sheets could collapse, with sea levels rising up to 10 metres (30 feet) – though how quickly that could happen is uncertain.
■ Warming of 1.5°C would destroy at least

70% of coral reefs, but at 2°C more than 99% would be lost. That would destroy fish habitats and communities that rely on reefs for their food and livelihoods.

3. FOOD, FORESTS, DISEASE

■ Warming of 2°C versus 1.5°C would also increase the impact on food production. "If you have crop failures in a couple of the bread-baskets of the world at the same time, then you could see extreme food price spikes and hunger and famine across wide swathes of the world," said climate scientist Simon Lewis at University College London. A warmer world could see the mosquitoes that carry diseases such as malaria and dengue fever expand across a wider range. But 2°C would also see a bigger share of insects and animals lose most of their habitat range, compared with 1.5°C, and increase the risk of forest fires – another risk to wildlife.

WHAT IS A PRE-INDUSTRIAL CLIMATE?

1 The Industrial Revolution began in the late 1700s in Britain, and spread around the world. But this only marked the beginning of a gradual rise in our greenhouse gas emissions. Various studies have found climate change signals appearing on a global scale as early as the 1830s, or as recently as the 1930s. So, scientists in order to measure global temperature gave a new baseline – a time when fossil-fuel burning had

yet to change the climate – the period 1850-1900, and this is described as "pre-industrial"

2 Global temperatures likely increased by more than 0.6°C from the pre-industrial period up to 1986-2005. This means that the year 2015 was at least 1°C warmer than the pre-industrial era and 2016 was more than 1.1°C warmer

3 Interestingly, 2015 was likely the first time in recorded history when global temperatures were more than 1°C above pre-industrial levels

Ruskin 'Bonds' with India in his new book

Jawaharlal Nehru was a man of the people and of many gifts and achievements, says veteran author Ruskin Bond in his new book, and describes Prime Minister Narendra Modi as a man of humble beginnings, whose political acumen and yogic willpower have brought him to the top. In 'A Little Book of India: Celebrating 75 Years of Independence', Ruskin Bond draws on his own memories and impressions to pay homage to the country that has been his home for 84 years. "We have had many outstanding prime ministers – Nehru, Shastri, Indira Gandhi, A B Vajpayee, Manmohan Singh, many others – and now Narendra Modi, a man of humble beginnings, whose political acumen, natural sagacity, and yogic willpower have brought him to the top and kept him there through two general elections," he writes.

1 Ruskin Bond, who was a schoolboy when India attained independence, recalls how the Tricolour was hoisted and the Union Jack came down at his boarding school in Shimla
2 He also talks about Nehru's iconic speech, saying it was a "reflection of his knowledge of world affairs and his familiarity with the English language".

3 Nehru, for Ruskin Bond, was a "dapper individual, almost always to be seen with a red rose in his buttonhole. He had been to an English public school and University, and spoke and wrote fluently in English. He was a westernised Indian, but also a man of the people. He loved the crowd and addressed them with enthusiasm"

BOOK

Now crash helmet, safety harness to be mandatory for children below 4 yrs on motorcycles

The road transport ministry on Wednesday notified new rules to make the use of safety harness and crash helmet mandatory for children below the age of four years on motorcycles. The new rules state that the speed of a motorcycle with a child up to the age of four years being carried on the pillion will not be more than 40 kmph.

These rules will come into force after one year from the date of publication of the Central Motor Vehicles (Second Amendment) Rules, 2022. For children below four years, safety harnesses shall be used for attaching the child to the driver of the motorcycle, the ministry said

VIEWPOINT

Safety harness is a vest to be worn by the child, which shall be adjustable, with a pair of straps attached to the vest and forming shoulder loops to be worn by the driver. This way, the upper torso of the child is securely attached to the driver

River Ravi the most-polluted in the world

Not just the air but also the river flowing through Lahore has been found to be the world's most-polluted, with active pharmaceutical ingredients posing a 'threat to environment and human health', Dawn reported. A study on pharmaceutical pollution of the world's rivers conducted at the University of York detected pharmaceutical particles, including paracetamol, nicotine, caffeine and epilepsy and diabetes drugs in the river.

Environment

The study placed waterways in Lahore, Bolivia and Ethiopia among the most-polluted while rivers in Iceland, Norway and the Amazon rainforest fared the best

France's Claire Denis wins best director at Berlin film festival for 'Both Sides of the Blade'

France's Claire Denis won best director at the 72nd Berlin film festival on Wednesday for 'Both Sides of the Blade', starring Juliette Binoche as a woman torn between two lovers in pandemic-era Paris. Denis, 75, was one of the seven women in competition at the festival, which ranks with Cannes and Venice among Europe's top cinema showcases.

The Berlinale is now the third major European film festival in a row to award its top prize to a woman director, following Cannes and Venice, which did so last year

Scream Like a Mother!

US MOMS GATHER IN FIELD TO SCREAM AND RELEASE STRESS

WHY WERE THEY SCREAMING? DID SOMEONE HURT THEM?

The pandemic did, actually. These are mothers of young children, many under the age of five years, in the US who gathered in a field to scream because they were just so fed up.

SOUNDS LIKE A TERRIFIC IDEA!

Right? It was organised by a woman who was a therapist, yoga teacher and mom herself, after some of her clients suggested it, so that they could vent.

WHAT HAPPENS AT THESE ‘SCREAMATHONS’?

It is fairly simple – a few rounds of some regular, loud screaming, then a round of good ol’ fashioned swearing, another of screams or shouts and then a last yell in honour of those moms who were too busy to attend.

PRETTY COMPREHENSIVE! WHY MOMS OF JUST YOUNG KIDS THOUGH?

In the US, the under-five are not eligible for vaccination yet so that was one reason life seemed to be full of uncertainty for their mothers, more so than other age groups. Then all the general anxiety around the pandemic, the sense that it seems to be lasting forever – all those familiar feelings.

WHAT DID THE ATTENDEES THINK?

They were elated, according to reports. They said it felt very liberating to just let it all out and not care, for once.

IT'S AN IDEA WHOSE TIME HAS COME

Indeed. It could be added to our new ambitious mental health programme, along with the tele counselling centres announced in the Budget recently. I'm sure the moms here are no less fed up!

JUST IN JEST

An 8-year-old writer's 'book' being a 'library hit' has a lesson for publishers

Horse Before Cart, Readers Before Books

Over the last week, a certain section of the English-language publishing and books – talking (not necessarily books-reading) world expressed anguish over the shutdown of a publishing house. Theories about its closure continue to be in the air like spring pollen. But one fact went relatively unspoken: the fact that not enough people bought its books for it to break even, never mind turn a profit – not under the Tatas that owned it since 2008, not under Amazon that owned it since 2017. The challenge, not just for the soon-to-be-defunct publisher but all other existing ones (especially in English language) in India, is whether there are enough people who buy books, who have a book-reading habit?

If nothing else, here's an inspirational tale from faraway Idaho, US, if it helps. The 8-year-old Dillon Helbig wrote a Christmas adventure story in his notebook and during a visit to the local library – yes, libraries still exist in book-reading cultures – he slipped in his 81-page 'book' in one of the shelves. This was not a famous writer, or even a published one. And, yet, days after its surreptitious entry into the library, 'The Adventures of Dillon Helbig's Crismis' has a 56-person waitlist of readers at the library. Moral of the story? First ensure there are enough readers, then produce books. The other way round gets very tricky.

LATA MANGESHKAR 1929-2022

The Voice That Moved India

ANIRUDHA
BHATTACHARJEE

There was a time when music in India was identified with a host of singers. Favourites would change with region, language, economic status and demographic profiles, even religion. Then came Lata Mangeshkar.

Even the doyens of classical music were unanimous in their praise for Lata. Bade Ghulam Ali's much-quoted words, 'Kambakth kabhi besuri nahi hoti... kya Allah ki den hai' (Bloody hell, she's never out of tune... what a gift from Allah), were not apocryphal. It is something the Hindustani classical fraternity of-

A few songs by Lata would act as a security blanket for a film producer. Heroines would insist on her being their playback singer, some even including it in their contracts

get that at 20, she was possibly India's most familiar singing voice, with listeners sending postcards to AIR asking for the name of the singer of 'Aayega Aane Wala' from the 1949 film 'Mahal'. By the time she was in her mid-20s, Lata was a favourite. Composers would consider themselves blessed to record with her. Even OP Nayyar, the only famous composer of the golden age of film music who never sought her musical services, would mention that Lata and composer Madan Mohan were a combination like no other.

A few songs by Lata would act as a security blanket for a film producer. Heroines would insist on her being their playback singer, some even including it in their contracts. It was not just because she had a wonderful voice, but also because she created a style that was completely her own – modern, yet bearing a traditional touch.

With Lata behind the microphone, nasal twangs and over-the-top emotional style became a thing of the past. She was no longer the 'desi Noor Jehan', referring to the iconic pre-Independence Indian and Pakistani playback singer. Lata became the voice of a new India, where melancholy could be embodied in soft but bold notes, and where high notes need not be weepy or screechy.

Lata was perhaps the first female singer in Hindi cinema who made a habit of hitting notes in a straight-

adage 'form is temporary, class is permanent'.

While the 1970s-80s witnessed batons changing hands, Lata remained the singer of choice. There are stories of her involvement in broken relationships and acrimony-laden fights. Her personal life was often scrutinised threadbare, people forgetting that navigating through the Cretan maze that is the Hindi film industry was no mean task. This was expounded best by her favourite fellow singer, Kishore Kumar, whose admiration for her dedication was profound.

There is little to demarcate between a Lata Mangeshkar recording and her singing at a live event. She would replicate the notes and nuances of the former precisely in the latter. Her expertise at singing in multiple languages with unfailingly good diction spoke volumes of the student in her, underlining her eagerness to internalise emotions in dialects that were not her native Marathi, Konkani, and Hindi.

Over the last few years, there were more than a few premature Lata Mangeshkar obituaries written and kept ready. It was perhaps divine intervention that Goddess Saraswati chose her favourite disciple to come along with her on the day of her visarjan. Call it poetic justice.

The writer is co-author of 'RD Burman: The Man The Music' Source: ET Edit

Mangeshkar (second from right in the picture, seated with her mother, Shevanti, and her brothers and sisters) started singing onstage from age 9, going on to record songs till she was 89, an incredible stretch of 80 years

RAHUL BAJAJ 1938-2022 An intimate salute to a brave, industrious, larger-than-life presence

OMKAR GOSWAMI

On Saturday, India lost a corporate colossus, and I a long-standing guru, friend and elder brother. A supremely independent man with a powerful, larger-than-life physical presence, Rahul Bajaj was suffering from rapidly declining health over the last few months. We prayed that a man such as he not be subjected to the indignities of artificial life support. He passed away – regrettably not at home, but with as much dignity as possible at Ruby Hospital in Pune.

I have known Rahul since 1978, worked very closely with him since 1997, served on boards of some of the companies he chaired, often argued till the cows came home, confidentially shared details about many things under the sun and, all the while, learned so many different things from him over the years. Here are some memories.

Well Read, Read Well

In 1996, Tarun Das, director general of the Confederation of Indian Industry (CII), asked me to join a committee headed by Rahul to draft a code on corporate governance. I prepared one at par with best international standards and presented it for discussions with a gnawing concern that an industry association would have little

truck with most of these. That's when Rahul came into play.

Over three consecutive days at his office in Akurdi, Pune, from early afternoon till late evening, he meticulously went through the document inserting several scores of corrections scribbled in his tiny hand writing, running helter-skelter over the pages. Some we agreed upon instantly, others we argued about. But at the end of it, the draft was far superior to what I had originally written – inform, structure and content. Thanks to Rahul.

At the end of it, when I asked him, 'So, how will you sell these 'revolutionary' ideas to your membership?' he answered, 'Leave that to me, young man.' And he did so with such presence and panache that the document became India's first comprehensive corporate governance code, almost all of which was subsequently incorporated by the Securities and Exchange Board of India (Sebi).

Three years later, when I was in CII, Rahul, by a curious quirk of fate, was elected for the second time around as its president. It never happened before, nor since. During that year, I had to interact with him very closely and often accompany CII delegations with him. That's when I got to know him better, and when he began to tutor me on many things under the sun. Here are some less-known vignettes of f

TOI LINE OF NO CONTROL

SANDEEP ADHWARYU

GANDHI REUNITES WITH A GANDHIAN

Rahul, now who will take care of my two wheeler down there?

First, the speed and meticulousness with which he read and corrected drafts was second to none. Having interacted with Rahul on hundreds of such drafts covering various topics, I concluded that he must have been a great copy editor in his previous life. With neither spectacles nor reading glasses, he is the only man I know who would speed-read any page typed in 10-points single space and unerringly mark all the typos as well as grammatical and syntactical errors in a trice.

Second, all who knew Rahul can vouch for his unquenched curiosity, love for facts and debates. There is nothing he loved more than an argument. And if the debate went against him, Rahul would be first to acknowledge it with grace.

No Dieting for Body, Copy

Third, a joke that he and I often shared was that Rahul must have failed the precis question in Class 7. Remember the one where you had to rewrite 200 words to 100 or 50? With great gusto, Rahul could dictate something that, with all the qualifiers that went through his mind, could turn 200 words to 400. Without even trying.

He never carried an iota of malice. Towards anyone. In the last 30-odd years, I had never heard him speak spitefully of any person – though he was observant enough to be uproariously catty in private company. Rahul also had friends across society, not just businessmen. On the one hand, he was the Indian delegation's hero at Davos. On the other, he got the driver, who was always at his service in Davos to accompany him, to spend time as his guest in Pune.

I will forever remember Rahul's broad smile, his open laugh, his embarrassing inability to go on any diet worth the name, and his knack to take a joke on himself, with genuine appreciation. He was loath to praise his family. But, in the privacy of his living room at Akurdi, he was incredibly proud of his two boys – for Rajiv with Bajaj Auto and Sanjiv with Bajaj Finance and the insurance companies. And what a dancer he was! I have not seen anyone doing a close dance as well as Rahul. With a style and swing that was, and is, bereft of most Indians of his time, and after.

Tarun Das and I spoke when thenews of Rahul's death reached us. He was very close to Rahul, and began by saying, 'The lion has departed.' That's the most fitting tribute to Rahul Bajaj. There will never be another like him. In every way. The writer is chairperson, Corporate and Economic Research Group (CERG) Advisory Source: ET Edit

Piya Bina, Piya Bina Basiya Baaje Na...

It was always a high-pitched voice – or, as producer Sashadhar Mukherjee, to whom Lata Mangeshkar's guru, music director Ghulam Haider first introduced her, described as a 'too thin' a voice – that enthralled not just a nation, but anyone with a taste in music. If Noor Jehan was her vocal role model at the start of her career as a singer in the cage-free India of the 1940s, Mangeshkar came into her own over the decades that followed. Her soprano and style of singing straddled both the 'traditional' and 'modern', making her the darling of Hindi movie 'playback' songs as cinema in this country also matured with her. That her first hit, 'Dil Mera Toda, O Mujhe Kahin Ka Na Chhoda' was from a different era – the 1948 Nazir Ajmeri-directed 'Majboor' – only shows the power and the duration of the spell she cast on the very notion of the song for over 70 years.

'Filmi geet' being synched to films, it took 'Aayega Aane waala' in the 1949 Kamal Amrohi-directed film, 'Mahal', for Mangeshkar to be 'listened to' and noticed for the talent she was via Madhubala. The rest, as they say, was sheer melody. The Naushad-composed 'Pyar Kiya To Darna Kiya' from K Asif's 1960 'Mughal-e-Azam', again with Madhubala on screen, sealed her reputation as the 'Nightingale'. In the 1960s and 1970s, Mangeshkar was Hindi song, perhaps most potently, magically in the 1973 Hrishikesh Mukherjee film 'Abhimaan'. With her silence, music is now bereft of a beloved, piya bina...

WORDPLAY

Considering, we are paying a tribute to the Nightingale of India, Lata Mangeshkar, what could be more befitting than to learn about a term or a word that's related to music?

SO, THIS WEEK'S WORD IS SOPRANO

What does it mean?

Soprano, plural sopranos is defined as: a) the highest singing voice. Examples in sentences are... "a piece composed for soprano, flute, and continuo" "a female or boy singer with a soprano voice." "a part written for a soprano voice." b) an instrument of a high or the highest pitch in its family. Example... "a soprano saxophone"

Etymology

The word 'soprano' comes from the Italian word sopra (above, over, on top of), as the soprano is the highest pitch human voice, often given to the leading female roles in operas. The term 'soprano' is also based on the Latin word 'superius' which, like 'soprano', referred to the highest pitch vocal range of all human voice types. The word 'superius' was especially used in choral and other multi-part vocal music between the 13th and 16th centuries.

Did you know?

Within the soprano voice type category are five generally recognised subcategories: coloratura soprano, soubrette, lyric soprano, spinto soprano, and dramatic soprano.

LETTERS TO THE EDITOR

Showcasing ingenious ideas of young minds

Hillwoods Academy organised 'Innovative Exhibition' from Jan 27 to Feb 3, an initiative to showcase ingenious and creative ideas of the young minds. With spirits flying high, the young Hillwoodians came together on virtual platform to share their ideas with their friends, parents and teachers.

Students exhibited their creative ideas in various subjects like science, commerce, maths, english, hindi, social science and computer science. The event was put on live telecast for the parents and students using the YouTube link.

The young entrepreneurs impressed the audience with their unique business ideas in the commerce exhibition. They introduced their amazing creations of Wasp computer, the pocket computer which supports Python and C++, track tags to keep tracks of valuables, apps for foods and tourism.

The students gave various presentations of games using scratch, python etc in the computer science exhibition. The students created effective management softwares for inventories and registrations.

The students of classes VI to VIII took the audience on the tour of Kerala, Tamil Nadu and various bird and wildlife sanctuaries around the country as a part of the English exhibition. The students of class IX did a live sports commentary on different sports ranging from sprint race to kabaddi. Class XI students made advertisements, keeping in mind the need of the hour. The activity was presented in the form of a channel and was named Hillwoods Educational Channel.

The students, in the math exhibition, through 'Math in Art' made beautiful mandala and Warli art using symmetrical and geometrical shapes. Students

of class X and XI showcased how math can be fun with comic strips on some mathematical problems. The audience enjoyed skit presented on 'Application of math in real life'.

The hindi exhibition involved students presenting their creative works with reference to 'Hindi language and literature', using technology. The topics covered by the students included, writeups on the life of legendary authors and poets of Hindi literature, 'vyakaran' topics and a few plays. The highlight of the show was 'Hasya kavi sammelan'. India's future entrepreneurs from classes VI-

VIII presented innovative products which such as solar panel model, self-designed stylus pen and products made by recycling waste, in the social science exhibition. The students of classes IX-X highlighted the importance of sustainable development through different working models such as a solar car etc.

Science exhibition, called 'Sci-Fari' focused on artificial intelligence and the principle of learning by doing. Students showcased their talent through working models like DC motor, earthquake detector, hand warmers, robotics etc. Informative apps like ecotopia, war - win, ocean exploration were also presented. A radio show was presented to make everyone aware of the COVID vaccination, some myths regarding vaccine were busted through scientific facts.

The amalgamation of ideas was worth appreciating and every exhibition concluded with a round of question answer session with the participants by Principal, teachers and students from Delhi, Noida and Gujarat branches. A firm faith was established in the young generation that they are indeed the backbone of the nation.

Awareness campaign on World Cancer Day

Understanding the importance of health, students are kept aware by giving information about the significance of every day, whether it is related to education or social circle at **Ryan International School Sector 31 Gurugram**.

Following the guidance of Dr A F Pinto and managing director Dr Grace Pinto, students expressed themselves through various activities on the occasion of World Cancer Day. The students of class VIII

drew attention to various aspects of cancer through virtual platform by making posters, writing slogans and through short plays.

School Head N Geeta Srinivasa praised the short play and the messages that were presented by the students and inspired them to lay the foundation of a healthy society in life.

Green Valley launches scholarship scheme

Green Valley Academy celebrates February 14, famously known as Valentine's Day with much excitement, as it launched an annual scholarship scheme for girls named Prem Award for Girl's Education (PAGE).

The occasion marked the first commemoration of one of GVA's founding members Prem Lata Sharma, who had begun the school two decades ago.

The PAGE scholarship will be awarded to extraordinary girl students every year. Apart from considerable fee waivers and public recognition, the award entails special provisions like counselling and guidance programmes for these students.

Founding chairperson Kusum Lata shared "as the name suggests, our aim is to continuously make a difference in the area of women empowerment in this region and the country". She also added that Green Valley Academy's schemes like PAGE and pre-existing programmes like Battle for Inclusive Growth (BIG) and Oxford Programme for Education in Remote Areas (OPERA Plan) are small steps in the country's vision for education development and women empowerment".

INSPIRE AWARDS 2021-22

The Innovation in Science Pursuit for Inspired Research (INSPIRE) scheme is one of the flagship programmes of Department of Science and Technology (DST), Ministry of Science and Technology, Government of India. This year four students of **DAV Public School, Sreshtha Vihar, Delhi**: Ashish Garg (VIII), Hetal Bhasin (IX), Anmol Upadhyay (IX) and Ayushmaan Bhatnagar (X) have been selected for INSPIRE Awards and will be awarded ₹10,000 each for their unique and creative ideas.

To fight with the problem of anxiety, stress and hyperactivity, Ashish Garg introduced the idea of Peacer Band which provides the body a way to curb the negative instincts. Hetal Bhasin made a device which can convert hot air emitted from ac, into cold air. Anmol Upadhyay of class IX made a gadget called 'Co Signal' (car opening signal) which can help in avoiding accidents on road. To help the rescue teams during earthquakes, Ayushmaan Bhatnagar came up with the idea of a bionic arm named 'Rakshak' which works on materials like artificial muscles by giving strength to the arm enabling it to lift upto 200kgs.

Principal Suhasini K Nath congratulated all the winners on their incredible success and encouraged them to stay persistently committed to science and research.

A GOOD READER, IS A GOOD LEARNER

As we all are going through these unprecedented times where almost everything was put to halt during the 2020, when COVID-19 virus stroke the entire world, the only hope that we had was to normalise the pace of growth for our future generation. At this time, we at **Shahed Bishan Singh Memorial Sr Sec**

School, Mansarovar Garden turned adversity into an opportunity under the leadership of Puja Singhal, the principal of the school. With a step towards digital education where everything turned digital and children almost lost the school touch we continued the traditional way of learning and reading by emulating a physical library into the digital

world through e-learning activities in the library classes.

We understand that reading, writing and listening are the most important skills that every child should possess, we aimed at upskilling our students by organising reading sessions regularly during the library class and also encourage them to write stories, poems, essays etc.

The day I attempted exorcism walk

While reminiscing about the good old school days, one episode in class keeps coming to my mind. One day, I reached school quite early. When I entered my classroom, only three close friends were there. We talked for some time and then we decided to play and we chose 'truth or dare'. We took a bottle and spun it. The bottle stopped, pointing towards me and I chose 'truth'. My friend asked me if I were flexible or not? Without having a sure answer, I decided to say 'Yes'.

And then we continued the game. At one point the bottle again ended up pointing towards me. I felt like the bottle was smirking at me knowing my

fate. This time, I chose 'dare' and my friends told me to do an exorcism walk to check if I were flexible. I was nervous and hesitated. My friends, glared at me and I accepted the challenge. I lay supine and bent my knees and raised my hand and kept them on the floor and started to walk like a spider. To be frank it felt weird and embarrassing and the whole world looked topsy-turvy. I stayed like that for two minutes and the other classmates began to arrive and then I saw a figure standing before me. At first, I was confused, but soon realised it was my class teacher. She had a confused look. I tried standing up, but miserably ended up on the ground. I groaned in pain and got up. I smiled awkwardly at her and she passed me a nervous smile. All had a good laugh. I nearly died of embarrassment and glared at my friends who apologised later. I learnt soon that everyone goes through such embarrassing moments, but never thought I would have to go through one myself! Still, I can't help laughing and feeling nostalgic about those good old days.

Catch a bird's eye view, enjoy freedom

Iwish I were a bird, as that would make me the most mobile living being on the planet. I can effortlessly take to the skies, reach up the hills or glide above the seas. I would feel more powerful than humans, who cannot fly without the assistance of a machine. My field of vision is something that humans have phrased as 'bird's eye view', which is an acknowledgement of our ability to see things in a manner that even humans cannot. My freedom of movement is unrestricted, be it day or night. I can fly long distances in search of food or favourable climate. Nature has blessed me with a greater ability to adapt to changing habitat than most animals. I can easily build my home in a variety of surroundings. I can survive on a diverse diet ranging from fruits, nuts, grains, fish, meat etc. In olden times, I was of great assistance to human beings in carrying messages too.

Shruti V, class VI, Gregorian Public School, Ernakulam

**IF I WERE
A BIRD**

In pursuit of happiness

New Year 2022 started on a unique and intellectual note where all the teachers of **Sanatam Dharam, Pitampura** were asked to read a chapter from 'Even Happier', a gratitude journal by Tai Ben-Shahar. It was a great collective reading experience held virtually on

January 3 and 4 where teachers talked about the main idea in the chapter read by them and implementation of it in classroom and in individual's

life. Ajay Marwah, PGT mathematics, moderated the interactive session.

The principal Anita Sharma gave a befitting finale by summing it up and appreciated the teachers' contribution to complete it with wonderful interpretations and remarkable ideas. The input given by each teacher was an eye-opener and it will go a long way to make teachers' and students' life happier.

FIRMINO, SALAH FIRE LIVERPOOL

2-0 win at Inter Milan puts team in commanding position for CL

Liverpool took a firm grip on their Champions League tie with Inter Milan as late goals from Roberto Firmino and Mohamed Salah earned them a 2-0 victory in their last-16 first leg on Wednesday.

RESILIENT DISPLAY

Inter had the better of the first-half chances, but Juergen Klopp's side were resilient if not at their very best as they comfortably held the hosts at bay before inflicting two damaging blows on their opponents. Having struggled to create many opportunities, Klopp rang the changes in the second half, and one of those substitutes came up trumps, with Firmino flicking home from a corner to break the deadlock in the 75th minute.

With their resistance broken, the errors started to creep in for Inter and Salah pounced when they failed to clear a long ball into the box to put the game to bed seven minutes from time. Salah, aided by a slight deflection, stroked home the second after Virgil van Dijk had knocked down Trent Alexander-Arnold's long ball to seal the win.

The Egyptian has scored in each of his last eight away appearances in the Champions League, the second-longest ever such run by a single player, after Cristiano Ronaldo between 2013 to 2015.

Even with the away goals rule no longer in force, the victory puts the 2019 Champions League winners in a commanding position ahead of the

return leg on March 8 at Anfield.

Liverpool have won all seven of their Champions League matches this season, extending what is their longest ever winning run in Europe's elite club competition.

COSTLY WASTEFULNESS

Inter, back in the Champions League knockout stages for the first time in a decade, started brightly in front of a raucous crowd, unhindered by their reduced numbers as a result of COVID-19 restrictions.

Argentine striker Lautaro Martinez shot wide early on from distance, firing against the crossbar when afforded too much time in the penalty area.

Liverpool had plenty of efforts at goal in the first half, but struggled to create that killer opening, with Sadio Mane's header from a free kick that went just over as close as they came. There was not much improvement after the break from Liverpool, with Inter's final pass deserting them when it mattered most.

"This performance should give us plenty of confidence because we played a great game," Inter coach Simone Inzaghi said.

"We did not deserve to lose but that's football. I think we can be proud because we played a great game against one of the best teams in Europe." REUTERS

COMAN RESCUES BAYERN MUNICH

■ Kingsley Coman scored late to salvage a 1-1 draw for Bayern Munich at Salzburg in the first leg of their Champions League round of 16 meeting.

■ Bayern was forced to push hard after Junior Chukwubuike Adamu's 21st-minute opener for the Austrian champions. Coman equalized in the last minute to prevent the Bavarian powerhouse from slumping to its second consecutive.

■ Salzburg was playing in the Champions League knockout phase for the first time, and the home team showed no sign of fear against the six-time European champion. The 20-year-old Adamu, playing due to an injury to Noah Okafor in the 12th, eluded Niklas Süle and curled his shot inside the right post after a long ball from Mohamed Camara found Karim Adeyemi on the right wing. "In the end it feels like a defeat. But 1-1 is

something to be proud of," Adeyemi said. "We're ready for the next game."

■ Bayern hosts Salzburg for the second leg on March 8.

INDIA EYE VICTORY AGAINST WI

2nd T20I: Team hoping that Virat Kohli will regain his form

Clinical in most aspects of the game so far, India will now hope that star batter Virat Kohli also regains his form when they take on a struggling West Indies in the potentially series-deciding second T20 International on Friday.

The touring West Indies side has been far from being at its best and has failed to trouble the hosts in any of the matches so far.

Challenge for India

After being outclassed 0-3 in the ODI leg in Ahmedabad, the Kieron Pollard-led team was expected to give India some challenge in its favourite T20 format, especially after a 3-2 win over England in its last series at home. But they hardly managed to trouble the hosts in the first T20I, going down by six wickets.

Another win and it will be a third successive series win for Rohit Sharma after being named full-time captain for Team India.

Photo: PTI

Need bigger knock

The only concern for India is Kohli's form and he would definitely want a bigger knock than the scores of 8, 18, 0, and 17 so far in the assignment. Rohit is confident he will come good and has asked critics and media to spare him the constant scrutiny.

Going hard

Rohit knows the importance of going hard in the powerplay, which was in full display in his 19-ball 40 when he took Odean Smith to the cleaners in an over that conceded 22 runs. With Ishan Kishan struggling to get going at the other end, Rohit made the bulk of the 58 runs India scored in the powerplay, which meant they never fell behind the 158-run chase despite losing three wickets in the middle.

Thanks to Rohit's innings at the top,

things did not go much out of India's reach as Suryakumar Yadav and Venkatesh Iyer applied themselves beautifully to seal the chase.

With India opting for a six-bowler combination featuring pace bowler all-rounder Venkatesh, in-form batter Shreyas Iyer had to sit out of the opening game.

Fit-again Pollard

Pooran and a fit-again skipper Kieron Pollard stepped up the accelerator in the last five overs, scoring 61 runs to lift their total to 157/7. But it proved to be 15-20 runs short, bringing the focus back on their middle over struggles when debutant Indian leg-spinner Ravi Bishnoi made it difficult for the visitors.

With Holder back in business and Pooran and Pollard beginning to look at their ominous best, the West Indies would fancy their chances to keep the series alive. AGENCIES

SQUADS:

INDIA: Rohit Sharma (captain), Ishan Kishan, Virat Kohli, Shreyas Iyer, Surya Kumar Yadav, Rishabh Pant (wicket-keeper), Venkatesh Iyer, Deepak Chahar, Shardul Thakur, Ravi Bishnoi, Yuzvendra Chahal, Mohammed Siraj, Bhuvneshwar Kumar, Avesh Khan, Harshal Patel, Ruturaj Gaikwad, Deepak Hooda, Kuldeep Yadav and Harpreet Brar.

WEST INDIES: Kieron Pollard (captain), Nicholas Pooran (vice-captain), Fabian Allen, Darren Bravo, Roston Chase, Sheldon Cottrell, Dominic Drakes, Jason Holder, Shai Hope, Akeal Hosein, Brandon King, Rovman Powell, Romario Shepherd, Odean Smith, Kyle Mayers, Hayden Walsh Jr.

BADMINTON ASIA CHAMPIONSHIP: INDIA WIN AGAINST HONG KONG

The Indian men's team, led by world championship bronze medalist Lakshya Sen, secured a 3-2 win over Hong Kong in group A to keep its slim hopes alive of making the knockout stage at the Badminton Asia Team Championships on Thursday.

The crushing 0-5 defeat against Korea in their opening match has made life difficult for India as they are currently at the third spot in group A, just above Hong Kong, with one win and one loss.

Three-time defending champions Indonesia and Korea are currently ahead in the race to qualify from group A.

World no 13 Lakshya started the proceedings, thrashing world no 17 Lee Cheuk Yiu, a silver medallist at 2013 Asian Youth Games, 21-19 21-10 in 35 minutes to

Lakshya Sen

give India a good start.

Hong Kong's Law Cheuk Him and Lee Chun Hei Reginald notched up a thrilling 20-22 21-15 21-18 win over Manjit Singh Khwairakpam and Dingku Singh Konhoujam in the doubles.

However, the men's team will have to claim an outright win against title holders Indonesia on Friday. PTI

QUIZ TIME!

Q1: Which state of India houses the Rajiv Gandhi International cricket stadium?

- a. Andhra Pradesh
b. Telangana
c. Kerala
d. Tamil Nadu

Q2: How many times did India win the "Cricket World Cup champion" title?

- a. 1 b. 2 c. 3 d. 4
